

# CABLE SERVICES

From cable engineering and preparation of offshore installation procedures, to pull in; hang off termination; jointing and testing

MJR provides onshore and offshore expertise to Clients in offshore wind and submarine interconnector projects

We are predominantly focused on the following markets:

- Marine & Offshore Conversion, Construction & Fabrication
- Offshore & Subsea Oil & Gas Construction
- Offshore Wind & Renewables

We have significant and successful experience of providing project personnel to some of the UK's largest Offshore Windfarms including:

- Authorised & Senior Authorized Persons High Voltage Cable Jointers
- High Voltage Test Technicians
- Fibre Optic Cable Jointers & Test Technicians
- Commissioning Engineers Consulting & Design Engineers
- Client & Offshore Representatives
- Cable Package Managers

# CABLE SERVICES

**We have been involved in some of the UKs largest Offshore Windfarm construction projects where we have successfully managed and delivered export & inter- array (infield) cable termination, testing and commissioning packages**

**Typical projects have involved over 25,000 Offshore working hours and completion of all pull in, hang-off, termination and testing including 750 HV terminations and 6200 Fibre Optic terminations.**

Unlike most other service companies in the Offshore renewables sector, our field services are underpinned by a solid onshore engineering consultancy background. Not only can we carry out installation, testing and commissioning but we can also support this with a full range of design engineering and consultancy
